Sockets for the Home

*Elegant and reliable solutions that make every corner
of your home complete.*

Highlights

FlipAround offers four plug sockets, or three sockets with a fast 65 W charger, all under a rotating lid. It keeps your workspace neat and protected from spills, making it both practical and elegant. Perfect for kitchen worktops and kitchen islands.

Digitel

Hide the cables and add
sockets

To achieve harmony and exceptional design, sockets shouldn't be confined to walls alone. When built into furniture, they keep cables out of sight and bring power exactly where it's needed. Whether hidden in a TV cabinet, placed within a bedside table or seamlessly built into a kitchen island, they adapt to your rhythm and help the space remain tidy and beautiful. And when power is needed elsewhere, portable sockets can easily move with you so electricity follows your lifestyle.

NEW

FlipAround

The rotating cover features a locking mechanism that keeps everything stable during use and prevents accidental openings. Its design directs any liquid away safely, making FlipAround ideal for kitchens and wet areas.

FlipUp

With its special cable outlet and elegant design, FlipUp fits seamlessly into modern kitchens. The adjustable height range from 18 to 78 mm makes it perfect for wall-mounted units and compact spaces.

PopUp

A compact socket for modern kitchens, designed to resist spills and save space while keeping power within reach whenever you need it.

StandUp

A flexible unit that can be positioned wherever power is required. It stands neatly on furniture and instantly becomes a practical part of any space.

SlimFrame Media

Ideal for TV units and media areas. Sockets stay within easy reach, reducing clutter and keeping cables perfectly organised.

PRODUCTS

SlimFrame LED

Created for hanging cabinets, SlimFrame LED makes it simple to connect kitchen lighting. Installation is straightforward and safe, with no additional modifications required.

SlimFrame Bedside

Perfect for bedside tables and headboards. Compact and discreet, it provides a safe and convenient place to connect your lamp, phone or any device you keep close at night.

SlimFrame Flex

Designed to be built into the back panel of a drawer. A flexible spiral cable allows smooth drawer movement while keeping devices powered and ready.

SlimPremium Media

Combining minimalist design with high-quality materials, this version not only powers every device but also enhances the space with its refined look.

Our suggestions
